

## **CHAPTER 6 — WORKBOOK ANSWER KEY**

### **EXERCISE 6-1: Component 3s Review**

- 1) A small flow treatment facility is an individual or community sewerage system designed to adequately treat sewage flows not greater than 2,000 gpd for final disposal using stream discharge or another disposal method approved by the department.
- 2) True
- 3) unsuitable
- 4) new
- 5) repair, IRSIS
- 6) any
- 7) True
- 8) N
- 9) site suitability

The local agency SEO is responsible for conducting or verifying site testing to determine whether or not a site is suitable for onlot systems.

- 10) residual tract facilities

This part is only used when an existing onlot sewage system is found on the residual tract. During the inspection of the existing system, the SEO must determine if the long-term sewage disposal needs for the lot can be met. The SEO must also verify that no violations of the act or regulations were apparent during the inspection.
